DINO-RIDERS INFORMATION SHEET

The first full line of Museum Quality, Scientifically Accurate, 1/24 Scale Dinosaurs.

Each Dino-Rider Dinosaur is in scale to each other and to the fully articulated action figure that is enclosed in each set. (Some sets contain more than one figure.)

Each Dino-Rider Dinosaur is highly detailed and all but the Ankylosaurus (9111) and Pterodactyl (9112), have realistic taxidermist eyes.

Every Dino-Rider Dinosaur is armed to the teeth, fully accessorized and ready for battle!

Packaging

All Dino-Rider Dinosaurs are packaged in a fifth panel window box. The outside flap panel features the highlighted dinosaur in a fantasy illustration. Flip-up the panel, revealing the dinosaur in the window, so the consumer can examine the museum quality of the Dino-Riders. On the inside flap, we've highlighted all the features and battle accessories that are included.

On the back, we've created a collectible panel cross-selling the entire world of the Dino-Riders. The back also contains a cut-out card detailing some scientific information about the particular Dinosaur.

Phonetic spelling for pronunciation of Dinosaurs

9111	Ankylosaurus	An-KY-low-SAW-rus
