# HAKE'S AMERICANA AUCTION #208

**AUCTION CLOSURES MARCH 19-21**

2561

**2561. UNPRODUCED PROTOTYPE ACTION FIGURE "THE SEA CREATURES: BARON VON CUDER".** Sanrio 1985. See item #2556 for more details on the series. The prototype figure in this lot is "Baron Von Cuder" based on a barracuda with a crab claw

hand. There is a complete figure made of resin. He has an armored chest piece, a finned cloak and a harpoon weapon. He also has an articulated pincer on his crab hand. There is one child size ring base included. On this figure his legs are attached to each other and to figure but figure doesn't stand on its own. Also included in this lot is another figure minus the claw hand with detached legs, another head casting, another resin chest piece, a test painted torso in blue with two more chest pieces plated in chrome. Items will display Exc. Also included is a bw copy of the original concept color artwork with a few notations. Sheet folded, pin holes, taped with a clipped corner and has lt. crease from folding. Fine. The Baron has an amazing amount of sculpt detail in his scaled head with fangs. This item is truly unique and one of a kind, anything that could be called a defect is from the creative process of action figure design as it was in the 80s. From the archives of Toy Designer Rich Roland. (I) \$200.00

**2562. E.T. THE EXTRA-TERRESTRIAL ELLIOT AND E.T. ON BICYCLE PROTOTYPE FIGURE.** c. 1982. Black resin casting in two halves of Elliot on

2562

bicycle with two castings of E.T.'s head and shoulders. Figure is Exc. as produced. This item is truly unique and one of a kind, anything that could be called a defect is from the creative process of action figure design as it was in the 80s. From the archives of Toy Designer Rich Roland. (H) \$100.00

**2563. PROTOTYPE GREMLIN'S STRIPE BENDY FIGURE.** ©1984 LJN. First is 6.5" tall blue/green resin prototype figure. Missing outer fingers and ear tip. Second is a brown foam casting that was designed as an armature model for the bendy. Figure has surface slices where part of the armature was removed however there is still a wire armature in his legs. Figures are Exc. as produced. This item is truly unique and one of a kind, anything that could be called a defect is from the creative process of action figure design as it was in the 80s. From the archives of Toy Designer Rich Roland. (H) \$100.00

**2564. "DINO-RIDERS - STEGOSAURUS" PROTOTYPE LOT.** Lot includes final motorized production model for Stegosaurus, from the second series of "Dino-Riders" toys. 1989. Toy comes w/production rear leg armor and what appears to be prototype design armor on back as the areas around the "Dual Laser Canon Clusters" appear slightly different and armor is pieced together, not final painted version. This armor shows moderate aging and is Fine overall. Stegosaurus itself show lt. paint wear and is Fine/VF. Comes w/hard cast resin prototype of Stegosaurus (unassembled) that is smaller in scale than final production piece. Stegosaurus's head has ink notations on it, showing a "Brain Box" design, which indicates there was at one time a plan for an evil Rulon version of this toy (which was never produced). Back plates were at one point glued in place and there is some aged glue residue along slots for these plates. Could be easily reassembled for display. VF. From the personal collection of Lee Volpe, Tyco Toy's Manager, Director, and VP of New Product Development (1982-1994) who was involved from the beginning of the development of Dino-Riders, Garfield telephones and several other Tyco toys. (I) \$200.00

**2565. "DINO-RIDERS" TOY SCHEMATICS/BLUEPRINTS LOT WITH ORIGINAL ART AND UNPRODUCED DESIGNS.** See previous item #2564. Lot of 16 blueprint/schematics w/designs related to the "Dino-Riders" toyline. Sizes range from 17x22" to 22x34". Four sheets feature printed designs for armor/weapons accessories. The other 12 sheets feature printed designs of proposed dinosaur toys that were never produced. These include seven sheets w/Parasaurolophus (including one evil Rulon design) printed image and hand-drawn pencil armor/weapons designs. The other five sheets feature same set-up w/designs for Iguanodon (all evil Rulon designs) toy. These toys were designed to be larger, motorized toys in the line, each coming w/two action figures. The Parasaurolophus was initially designed to be have a motorized, running feature and be remote-controlled via a wearable AMP (device the Valorian used to communicate w/their dinosaurs in the series) necklace. We assume the Iguanodon would have a similar feature as the toys' sizes are comparable. Sheets have been stamp dated 1987 and have been rolled. Scattered handling wear as these were production designs. Scattered aging. VF overall. Great designs, including designs for two dinosaurs that were never produced in the "Dino-Riders" toy line! From the personal collection of Lee Volpe, Tyco Toy's Manager, Director, and VP of New Product Development (1982-1994)

who was involved from the beginning of the development of Dino-Riders, Garfield telephones and several other Tyco toys. (J) \$300.00

**2566. "DINO-RIDERS" PROMOTIONAL LOT.** Lot of 18 promotional "Dino-Riders" items. Lot includes a 10.25x11.5" "Dino-Riders Licensing Stylebook" binder w/numerous pages of artwork, story, designs and illustrations of toys; 15.25x18.25" framed animation cel from the "Dino-Riders" cartoon that shows two Rulon Pteradons landing on base; "Tyco 1989" toy catalog w/16 pages of "Dino-Riders" toy photos; VHS tape of first episode of "Dino-Riders" cartoon; the first issue of the "Dino-Rider" comic book published by Marvel Comics; one of the mini comic books that came w/the toys themselves; a packet of full color pages showing a proposed Japanese manga (comic book) treatment for the series; and a copy of "Toyland - The High-Stakes Game Of The Toy Industry" which was written by Sydney Ladensohn Stern and Ted Schoenhaus and was published by Contemporary Books in 1990. This book in part tells the story of the evolution of the "Dino-Riders" line and mentions Lee Volpe several times. Rest of lot consists of 10 Polaroid photos, four of which show a proposed Rulon version of the popular Diplodocus toy that never came to be. Other pictures show the "Brainbox" apparatus on an unfinished Tyrannosaurus and sculpts for the Torosaurus toy's head and armor. Varying degrees of handling wear/aging, most are VF overall. An interesting insight into the history of "Dino-Riders." From the personal collection of Lee Volpe, Tyco Toy's Manager, Director, and VP of New Product Development (1982-1994) who was involved from the beginning of the development of Dino-Riders, Garfield telephones and several other Tyco toys. **2567. "DINO-RIDERS - TYRANNOSAURUS REX" LARGE & IMPRESSIVE BOXED BATTERY-OPERATED DINOSAUR TOY.** "Dino-Riders" was a series of toys manufactured by Tyco Industries, Inc. and an accompanying cartoon series that focused on the battle between the heroic Valorians and the evil Rulons on prehistoric Earth.

The Valorians befriend dinosaurs whilst the Rulons brain-washed them. Produced beginning in 1988, there were four series of Dino-Riders toys: Series 1 (released in 1988), Series 2 (released in 1989), Series 3 and Ice Age (both released in 1990). The larger toys in the line had motorized walking action w/the dinosaur's head swaying from side to side. Rulon faction toys came w/a different self-automated trap. The dinosaurs were acclaimed for their highly detailed bodies/color and impressed the Smithsonian Institution who contacted Tyco to reproduce the dinosaurs for their "Dinosaur And Other Prehistoric Reptiles Collection." The first series of toys consisted of five Valorian and six Rulon toys and eight two-figure packs. A sixth Valorian toy, Torosaurus, was released at the end of the first series. Offered here is Tyrannosaurus Rex, the biggest dinosaur toy produced in the first series. Battery-operated, it walks forward and its fearsome jaws open and close. The toy comes w/figures of Krulons (the Rulon leader), Bitor and Cobrus as well as "Full Battle Accessories" that consists of armor and weapons that could be placed on the dinosaur, effectively turning it into a walking battle station. This toy was the highlight of the first series of toys. Comes w/mini comic book. Toy comes sealed in its original 14x22x10" deep box w/front flap that can be lifted to view contents. Box has some lt. corner tip wear and some creases to flap. VF w/contents Mint as sealed. From the personal collection of Lee Volpe, Tyco Toy's Manager, Director, and VP of New Product Development (1982-1994) who was involved from the beginning of the development of Dino-Riders, Garfield telephones and several other Tyco toys. This is the last example from his collection being offered by us. (I) \$300.00
