lost, but the four 5 1/2" figures are fairly difficult to find. For the record, the heads are plastic, and other costume parts are cloth. The articulation and posability are good, and metal is a super medium to show off detail. The packaging is a combination window box and card. Because of the popularity of *Star Wars*, this series was perhaps even more limited than Mego intended.

**DINO-RIDERS (TYCO) 1987-90**

This unusual action figure series combined dinosaurs with science-fiction weaponry. The regular series dinosaurs each came with one or more 2 1/2" figures, and six others were sold indi-

vidually. Most Dino-Riders figures came packaged two per card.
